

ABOUT SEAWAY

Established from modest beginnings in 1999, SEAWAY has grown to represent and champion the interests of key customers, developing a reputation for integrity, accuracy, accountability and lateral thinking throughout our journey.

Fast forward to today, SEAWAY now operates offices throughout Australia in addition to New Zealand, Fiji and China. Although we are Australian, we rightfully take our seat at the global table. And like all successful Australians we're capable, hardworking, resourceful, dependable and optimistic.

SEAWAY is emerging as one business offering fast freight forwarding on a global scale, multi-disciplined advisory services and proven technology and systems. We're driven by local insight yet maintain an international perspective. Seaway Logistics offers a one-stop logistics solution to organisations involved in international business.

Our portfolio of work is diverse, and our solutions are innovative. Seaway has a rich culture of provoking and sharing new ideas and we dedicate ourselves to exceeding client expectations in project delivery. We are committed to delivering projects that have economic, social and environmentally sustainable outcomes.

Fostering creativity within our team ensures that all staff reach their full potential and are provided the platform to grow as individuals and gain experience in various spectrums of expertise.

Our Project team consists of knowledge-based individuals who take pride in applying their experience to logistics solutions in their unique areas of expertise. The knowledge gained through our extensive project background is used and shared throughout our team. The Project team collaborate to use our collective knowledge to support our clients.

Repeat business coupled with continuous involvement in the execution of logistics solutions is testament to the capability of Seaway to value add in our approach to our clients. Our successes result in our strong history of being able to work in intimate partnership with clients to implement successful outcomes at all levels of the supply chain.

This is what makes us uniquely SEAWAY.

SERVICES & KNOWLEDGE

Our resource base means we can coordinate and deliver logistics solutions to projects with zero harm, on time, to budget and with a high degree of quality.

We have specialist knowledge and skills in all sectors including:

- Transport-planning- (International and Domestic)
- Supply Chain development
- Consultant co-ordination (Tariff Concessions)
- Letter of Credit documentation
- Statutory approvals, submission approvals
- Project management
- Feasibility studies, route management
- Supply Chain cycle costing

Our Project team consists of talented professionals employed across our Australian offices. These professionals are passionate experts in the field of Project Logistics Management from the source of product manufacturer right through to final delivery on remote project sites.
